Soluto: Anti Frustration software

Any program you find doesn't work properly can always be put back.

The screenshot shows the Soluto software interface. At the top left, there is a 'Home' button and a 'Removed application' section indicating 14 apps were removed in 23.7 seconds. A search bar and system tray icons are visible at the top right. The main area displays a list of removed applications with their startup times. A yellow callout box points to the list with the text: 'Anything in this list can be put back into startup by using the undo button.' A 'More' panel is open on the right, showing details for 'InstallShield Update Service Scheduler'. At the bottom right, there is an 'Undo All' button.

Application	Startup Time
COMODO Inet Sr	25 sec
Lotus Sr	0.2 s
MS Office	0.1 s
SSBkgd	<0.1
Skype	3 sec
Live Ess	1 sec
Glary Ut	0.5 s
IShield I	0.2 s
InsShield Upd	0.1 sec

Soluto: Anti Frustration software

This Fawn row of programs is where you select the program you either want to pause, delay or leave inboot.

Pause: lets it boot after essentials have started and you can commence working.

Delay: Only activate when needed.

In Boot is start Now in the Startup Sequence.

The screenshot shows the Soluto software interface. At the top, there is a 'Home' button and a search bar. Below this, a section titled 'Potentially removable (advanced users)' provides a warning: 'Remove these apps from boot only if you're sure you fully understand the implications. (15 apps, 43.3 sec)'. A table lists various applications with their boot times. The 'Mobile Devices' application is highlighted, and a detailed view is shown for it, including a recommendation and user preferences.

Soluto: Anti Frustration software

The screenshot displays the Soluto software interface. At the top left, there is a 'Home' button with a house icon. A search bar is located at the top right. Below the search bar, there are system status indicators: a clock showing a time change from 1:57 to 1:56 minutes, and a folder icon showing 61 apps. A 'Beta' badge is also visible. The main area is titled 'Removed applications'. A blue callout box on the left states: 'All programs moved into the blue line are set to delayed start'. Below this, another blue callout box says: 'Only activate when needed.' The interface shows a list of applications with their respective delay times. A detailed view for 'Mobile Devices' is shown, featuring a pie chart titled 'What other users did' with the following data: 13% (blue), 27% (green), and 60% (grey). The 'Mobile Devices' entry in the list has a delay time of 0.2 sec and is highlighted. At the bottom right, there is an 'Undo All' button.
