Privacy
Location, camera

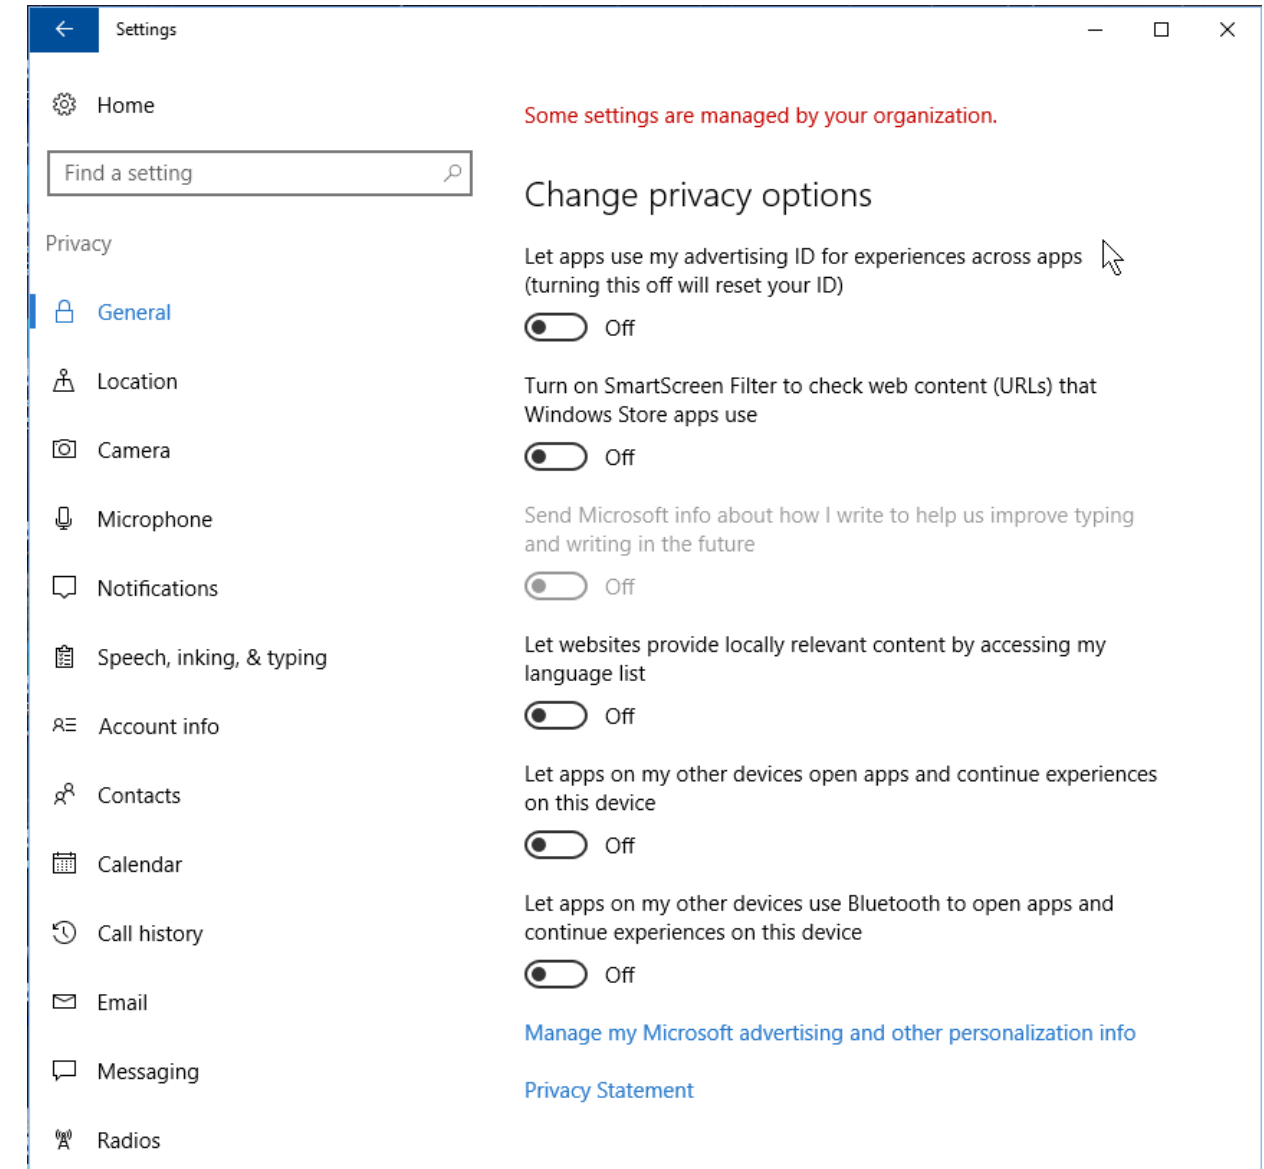

Update & security
Windows Update, recovery, backup

We start here

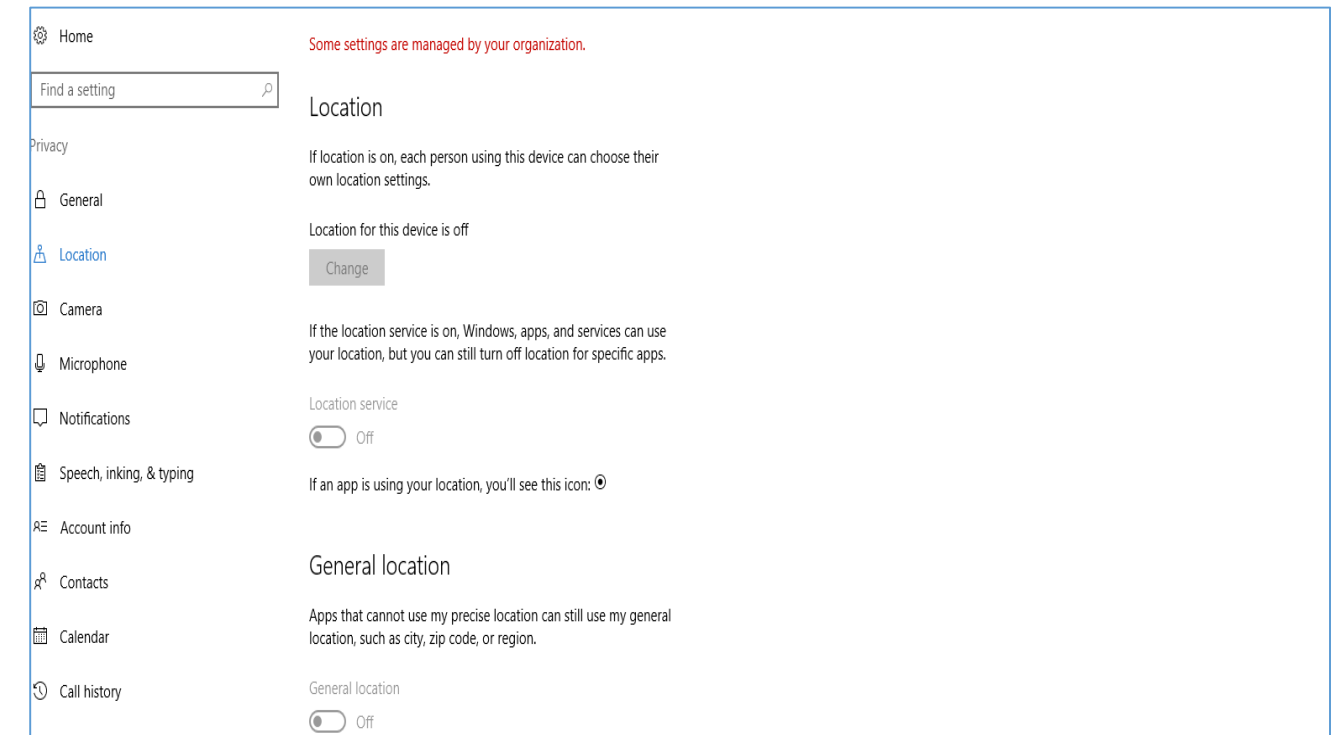

Scroll down to Feedback and Diagnostics.
Diagnostics and Data usage to Basic
Frequency set to Never.
It will whinge, let it.
Just ignore it its Microsoft being made blind to your usage.

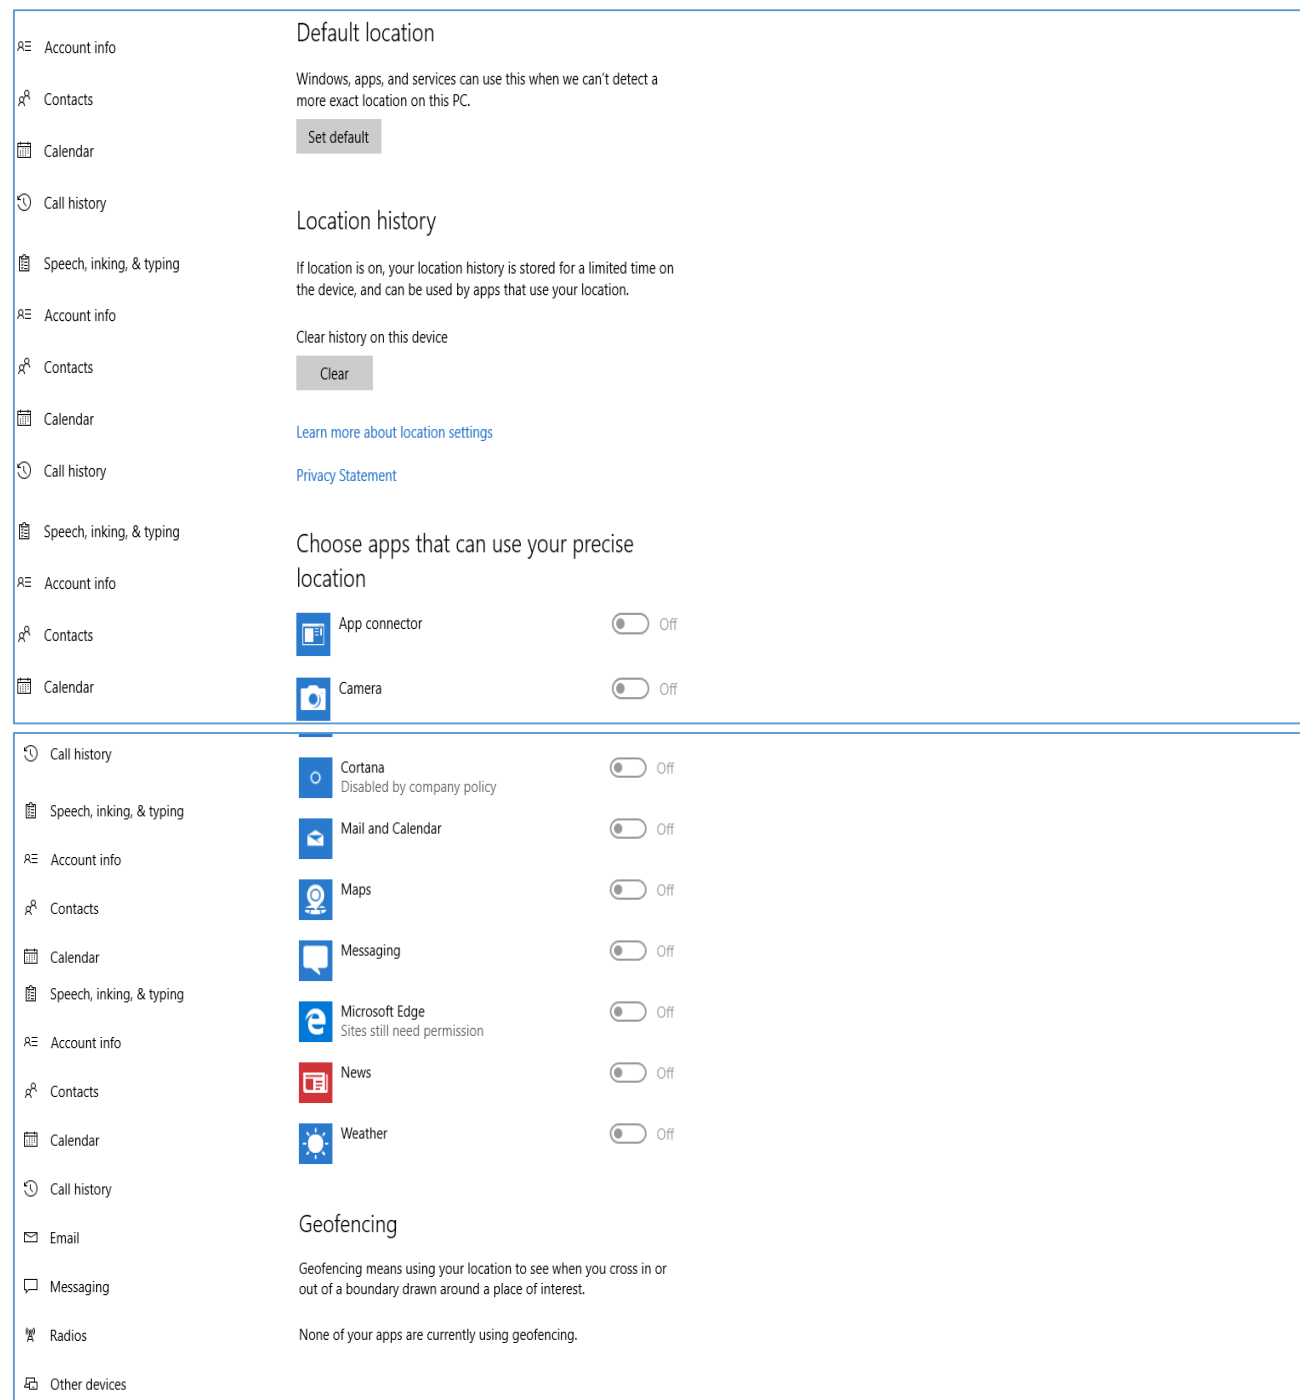

Under General.
Turn them all off.

These are the recommended settings under location.

Account Info: Turn it off

Turn off Cortana.

Turning Speech, Inking and typing off.

We don't need Microsoft to know all our personal stuff.

That it except if you want to total shutdown any leaks.

It's then time to put this program on your computer.

OOShutup 10

Create a folder on C:\ Drive called "OOShutup 10"

Copy file OOSU10 into it and Run it.

I left mine in Default and it's a very quiet computer.

I do know how to undo anything that I might find I need though.

All this and no guarantees.
